

## Construction at Five Points is underway

The Five Points Street Widening Project that will realign and improve the intersection of La Sierra Avenue, Pierce Street, Hole Avenue and Bushnell Avenue, known as “Five Points,” is now underway. The street alignment meets transportation demands, improves safety, and enhances the aesthetics of the area. The Project includes two through lanes, two left-turn lanes, a dedicated right-turn lane, and a Class II bike lane in each direction, separated by a raised and landscaped median.

The Project improves the aesthetics of the area by the addition of decorative crosswalks, landscaped parkways, and a publicly maintained landscaped area on the southeast corner of La Sierra and Hole Avenues. Bushnell Avenue will be closed to vehicular traffic at La Sierra Avenue to facilitate the realignment of the intersection and improve traffic circulation.

The Project is estimated to take approximately five months to complete. For more information call the Public Works Department at 951-826-5341 or visit [riversideca.gov/pworks/](https://www.riversideca.gov/pworks/)
